Declaration of AI Usage

Student Name: Fokou Touo Gilles adrien

Project Title: Maze Solver

Select one of the following options:

- ☐ **Option A:** No generative AI tools were used in the development of this project.
- ☒ **Option B:** Generative AI tools were used as specified below.

Details of AI Usage:

Phase	Tool	Specific Use Case
Planning and Design		/
Code Generation		/
Debugging	Gemini	Add colors to the results and logic C++.
Reporting	Gemini	Correct syntax errors, understand the commands for Doxygen to configure my doxyfile

Statement on Integrity:
Briefly describe how you verified the AI outputs (e.g., manual testing, logic refinement).

Verification was conducted throught manuel code execution and comparative analysis. I tested the debugging logic in real-time and manually audited the doxygen syntax to ensure the final report was accurate and the configuration file was fully functional.
Specific orders: GENERATE_LATEX ET EXTRACT_ALL

Student Declaration:
I confirm that the core logic and final implementation are my own work. I acknowledge full responsibility for the correctness of all content, including AI-assisted portions, and I am prepared to explain the logic during the oral defense.
